PROFILE

Network Engineer with 3+ years of experience in enterprise Network Operations, Monitoring, and Troubleshooting. Hands-on expertise in Cisco switching, WAN/MPLS, Meraki devices, wireless networks, and Palo Alto firewalls. Experienced in incident management, ISP coordination, and maintaining network stability in global environments.

WORK EXPERIENCE

Network Engineer — Stefanini Group 2023 - PRESENT
Project: LEAR Corporation | Aug 2022 – Present

- Perform daily network monitoring, including switches, routers, WAN links, SD-WAN, wireless, and firewalls.
- Troubleshoot L1 issues across switching, routing, WAN & SD-WAN, wireless, and security devices.
- Manage incidents, service requests, and escalations using ServiceNow & Ivanti.
- Coordinate with ISPs and internal teams for resolution of WAN/MPLS and device-related issues.
- Maintain documentation, perform configuration backups, and support routine network maintenance.
- Support basic configuration and troubleshooting of Cisco switches and routers.
- Assist with VLANs, trunking, port channel, and interface-level issues.
- Perform IOS upgrade activities on switch and firewall
- Monitor Cisco Meraki devices and MPLS/WAN circuits for latency, packet loss, and utilization.
- Report link degradation to ISPs and escalate issues for timely resolution.
- Aruba ClearPass Management: Guest access management, including Createing, deleting and updating profile using Aruba Server.
- Support guest access profiles and monitor ClearPass authentication logs.
- Assist with basic troubleshooting for user access issues.
- Perform basic monitoring of firewall health, logs, and traffic.
- Understand Zones, Security Policies, and NAT at a basic operational level.
- Report and work blocked traffic, policy hits, and interface alerts.
- Monitor HA status and checking live logs on firewall.
- Execute Palo Alto firewall upgradation in HA (Active/Passive) environment, including pre-upgrade validation, upgrade execution, and post-upgrade checks.
